

# User Acceptance Testing (UAT) Template

Date	20 February 2026
Team ID	TVIP2026TMIDS41611
Project Name	OrderOnTheGo: Your On-Demand Food Ordering Solution
Maximum Marks	

## Project Overview:

Project Name: OrderOnTheGo: Your On-Demand Food Ordering Solution

Project Description: A comprehensive food ordering platform with role-based access for customers, restaurant owners, staff, and administrators. Features include menu management, cart/checkout, orders, payments (Razorpay), reviews, staff invites, subscriptions, and admin analytics.

Project Version: v1.0.0 (Production Release)

Testing Period: 1 FEB 2026 to 29 FEB 2026

## Testing Scope:

### Features & Functionalities to be Tested

#### Phase 1: Authentication & User Management

- User Registration (email/password)
- Email Verification (SendGrid)
- Phone Verification (Twilio OTP)
- User Login (JWT token)
- Password Reset
- Profile Management (CRUD)
- Profile Image Upload
- Role-Based Access Control (USER/RESTAURANT/STAFF/ADMIN)

#### Phase 2: Restaurant Management

- Restaurant Registration
- Admin Approval/Rejection Workflow
- Restaurant Profile Updates
- Restaurant Image Upload
- Restaurant Listing & Search

#### Phase 3: Food & Menu Management

- Create Food Items

- Update Food Items
- Delete Food Items
- Toggle Food Availability
- Food Listing & Filtering
- Food Details Display

#### **Phase 4: Cart & Checkout**

- Add Items to Cart
- View Cart
- Remove Items from Cart
- Quantity Management
- Cart Total Calculation
- Cart Persistence

#### **Phase 5: Order Management**

- Place Order from Cart
- Order Confirmation
- Order Status Tracking
- Order History
- Order Status Updates (PLACED → PENDING → CONFIRMED → PREPARING → READY → OUT\_FOR\_DELIVERY → DELIVERED)
- Staff Status Change Requests
- Owner Status Change Approval

#### **Phase 6: Payments**

- Razorpay Order Creation
- Payment Gateway Integration
- Payment Verification (Signature Validation)
- Payment Status Updates
- Transaction Tracking
- Refund Handling (if applicable)

#### **Phase 7: Reviews & Ratings**

- Submit Food Review
- View Reviews

- Update Review
- Delete Review
- Rating Aggregation

#### **Phase 8: Staff Management**

- Staff Invite Creation
- Staff Token-Based Registration
- Staff Profile Management
- Staff Approval Workflow
- Status Change Request Flow

#### **Phase 9: Subscriptions & Plans**

- Subscription Plan Selection (FREE/BASIC/PREMIUM)
- Subscribe to Plan
- Cancel Subscription
- Subscription Limit Enforcement (menu items, staff)
- Plan Upgrade/Downgrade

#### **Phase 10: Admin Dashboard**

- User Management
- Restaurant Approvals
- Order Management
- Food Management
- Analytics (Revenue, Orders, Subscriptions)
- Staff Management

#### **Phase 11: Notifications**

- Email Notifications (SendGrid)
- SMS Notifications (Twilio)
- In-App Notifications

#### **Phase 12: Security & Performance**

- CORS Configuration
- JWT Token Expiry
- SQL Injection Prevention
- XSS Protection

- Performance Under Load
- API Response Times

**Testing Environment:**

Component	Details
Backend URL	<a href="https://orderonthego-gibr.onrender.com">https://orderonthego-gibr.onrender.com</a>
Frontend URL	<a href="https://orderonthegofoods.netlify.app/">https://orderonthegofoods.netlify.app/</a>
Frontend URL for Admin	<a href="https://orderonthegofoods.netlify.app/admin-access/">https://orderonthegofoods.netlify.app/admin-access/</a>
Database	MongoDB Atlas (Cloud)
API Testing Tool	Postman
Browser Testing	Chrome, Firefox, Safari, Edge (Latest versions)
Mobile Testing	Safari (iOS), Chrome (Android)
Test Data	Seeded via seed scripts; sample users and restaurants created
Credentials	See table below

**Test Credentials**

Role	Email	Password	Status
USER	thathieswarreddy3021@gmail.com	Eswar@3021	Active
RESTAURANT OWNER	thathieswarreddy@gmail.com	Eswar@2005	Approved
RESTAURANT STAFF	orderonthegoproject@gmail.com	Eswar@2005	Approved
RESTAURANT MANAGER	thathieswarreddy5061@gmail.com	Eswar@5061	Approved
RESTAURANT CHEF	thathireddydeswarreddy3021@gmail.com	Eswar@3021	Approved
RESTAURANT DELIVERY	shopezproject@gmail.com	Eswar@2005	Approved
ADMIN	admin@gmail.com	12345	Active

## Test Cases

### Phase 1: Authentication & User Registration

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	User Registration with Valid Email	1. Navigate to Register page. 2. Enter email, password, confirm password. 3. Click Register.	User created; verification email sent; user redirected to login.	User created; verification email sent; user redirected to login.	Pass
TC-002	User Registration with Duplicate Email	1. Attempt to register with existing email.	Error message: "Email already exists".	Error message: "Email already exists".	Pass
TC-003	User Registration with Invalid Email	1. Enter invalid email format (e.g., "invalid@"). 2. Submit.	Frontend validation error or backend 400 error.	Frontend validation error or backend 400 error.	Pass
TC-004	User Registration with Weak Password	1. Enter password < 6 characters. 2. Submit.	Validation error: "Password must be at least 6 characters".	Validation error: "Password must be at least 6 characters".	Pass
TC-005	Email Verification Flow	1. Register user. 2. Receive email with verification code. 3. Click link or enter code.	emailVerified flag set to true; user can log in without restrictions.	emailVerified flag set to true; user can log in without restrictions.	Pass
TC-006	Phone Verification with OTP	1. Register and provide phone. 2. Receive SMS OTP. 3. Enter OTP.	phoneVerified flag set to true.	phoneVerified flag set to true.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-007	User Login with Valid Credentials	1. Navigate to Login. 2. Enter email and password. 3. Click Login.	JWT token issued; user redirected to dashboard.	JWT token issued; user redirected to dashboard.	Pass
TC-008	User Login with Invalid Password	1. Enter correct email, wrong password.	Error: "Invalid email or password".	Error: "Invalid email or password".	Pass
TC-009	User Password Reset	1. Click "Forgot Password". 2. Enter email. 3. Receive reset link. 4. Set new password.	Password updated; can log in with new password.	Password updated; can log in with new password.	Pass
TC-010	User Profile Update	1. Log in as user. 2. Go to profile. 3. Update username, address, phone. 4. Save.	Profile updated in database; changes reflected on next login.	Profile updated in database; changes reflected on next login.	Pass

#### Phase 2: Role-Based Access Control

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-011	USER Cannot Access Restaurant Routes	1. Log in as USER. 2. Try to access /api/restaurant/menu.	401/403 Forbidden error.	401/403 Forbidden error.	Pass
TC-012	RESTAURANT Cannot Access Admin Routes	1. Log in as RESTAURANT owner. 2. Try to access /api/admin/users.	401/403 Forbidden error.	401/403 Forbidden error.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-013	ADMIN Can Access All Routes	1. Log in as ADMIN. 2. Try to access all dashboards and APIs.	All routes accessible; full permissions granted.	All routes accessible; full	Pass
TC-014	JWT Token Validation	1. Make request without token. 2. Make request with invalid token.	401 Unauthorized for both.	401 Unauthorized for both.	Pass
TC-015	JWT Token Expiry	1. Wait for token to expire (or manually expire). 2. Try to use expired token.	401 Unauthorized; user redirected to login.	401 Unauthorized; user redirected to login.	Pass

### Phase 3: Restaurant Management

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-016	Restaurant Registration	1. Log in as RESTAURANT owner. 2. Fill restaurant details (name, address, cuisine). 3. Submit.	Restaurant created with status "pending"; awaiting admin approval.	Restaurant created with status "pending"; awaiting admin approval.	Pass
TC-017	Admin Approve Restaurant	1. Log in as ADMIN. 2. Go to Restaurant Approvals. 3. Click Approve.	Restaurant status changed to "approved"; owner notified.	Restaurant status changed to "approved"; owner notified.	Pass
TC-018	Admin Reject Restaurant	1. Log in as ADMIN. 2. Go to Restaurant Approvals. 3. Click Reject.	Restaurant status changed to "rejected"; owner notified with reason.	Restaurant status changed to "rejected"; owner notified with reason.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-019	Restaurant Update Profile	1. Log in as RESTAURANT owner. 2. Update restaurant name, address, cuisine. 3. Save.	Restaurant details updated in database.	Restaurant details updated in database.	Pass
TC-020	Upload Restaurant Image	1. Log in as RESTAURANT owner. 2. Upload profile image (max 5MB).	Image uploaded; stored in file system or cloud; URL returned.	Image uploaded; stored in file system or cloud; URL returned.	Pass

#### Phase 4: Food & Menu Management

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-021	Create Food Item	1. Log in as RESTAURANT owner. 2. Click "Add Food". 3. Enter title, price, description, category. 4. Upload image. 5. Save.	Food item created; listed in restaurant menu.	Food item created; listed in restaurant menu.	Pass
TC-022	Create Food Exceeds Subscription Limit	1. Restaurant on FREE plan (limit: 10 items). 2. Already have 10 items. 3. Try to add 11th item.	Error: "Subscription limit reached. Upgrade to add more items".	Error: "Subscription limit reached. Upgrade to add more items".	Pass
TC-023	Update Food Item	1. Log in as owner. 2. Edit existing food (price, description). 3. Save.	Food details updated; changes reflected immediately.	Food details updated; changes reflected immediately.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-024	Delete Food Item	1. Log in as owner. 2. Click Delete on food item. 3. Confirm.	Food item removed from database and menu display.	Food item removed from database and menu display.	Pass
TC-025	Toggle Food Availability	1. Log in as owner. 2. Toggle availability flag for a food.	isAvailable flag updated; unavailable foods not shown in customer view.	isAvailable flag updated; unavailable foods not shown in customer view.	Pass
TC-026	View Food Listings	1. Log in as USER. 2. Browse restaurant or all foods.	All available foods displayed with correct prices, images, and ratings.	All available foods displayed with correct prices, images, and ratings.	Pass

#### Phase 5: Cart & Checkout

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-027	Add Item to Cart	1. Log in as USER. 2. Browse foods. 3. Click "Add to Cart".	Item added to cart with quantity 1; cart count incremented.	Item added to cart with quantity 1; cart count incremented.	Pass
TC-028	Add Same Item Multiple Times	1. Add item A twice.	Quantity of item A increased to 2 (not duplicate entries).	Quantity of item A increased to 2 (not duplicate entries).	Pass
TC-029	Add Items from Different Restaurants	1. Add item from Restaurant A. 2. Try to add item from Restaurant B.	Warning/error: "Cannot add items from different restaurants. Clear cart first?".	Warning/error: "Cannot add items from different restaurants. Clear cart first?".	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-030	View Cart	1. Click Cart icon.	Cart displays all items, quantities, prices; shows total.	Cart displays all items, quantities, prices; shows total.	Pass
TC-031	Remove Item from Cart	1. View cart. 2. Click Remove on an item.	Item removed; total recalculated.	Item removed; total recalculated.	Pass
TC-032	Update Item Quantity	1. In cart, increase quantity of item.	Subtotal updated; cart total recalculated.	Subtotal updated; cart total recalculated.	Pass
TC-033	Place Order from Cart	1. Add items to cart. 2. Click "Checkout". 3. Enter delivery address. 4. Select payment method. 5. Click "Place Order".	Order created; status set to "PLACED"; cart cleared; order confirmation displayed.	Order created; status set to "PLACED"; cart cleared; order confirmation displayed.	Pass
TC-034	Cart Persistence	1. Add items to cart. 2. Refresh page.	Cart items still present (stored in localStorage or backend).	Cart items still present (stored in localStorage or backend).	Pass

#### Phase 6: Order Management

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-035	View Order History (USER)	1. Log in as USER. 2. Go to "My Orders".	All user's orders displayed with status and details.	All user's orders displayed with status and details.	Pass
TC-	View Order Status	1. As USER, view an	Current status	Current status	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
036	Updates	order.	displayed (e.g., "PREPARING"); timestamp shown.	displayed (e.g., "PREPARING"); timestamp shown.	
TC-037	Restaurant Updates Order Status	1. Log in as RESTAURANT owner. 2. View incoming orders. 3. Change status from "PLACED" to "PENDING".	Status updated in database; customer notified (if real-time).	Status updated in database; customer notified (if real-time).	Pass
TC-038	Status Transition PENDING → CONFIRMED	1. Owner changes status to "CONFIRMED".	Status updated; customer receives notification.	Status updated; customer receives notification.	Pass
TC-039	Status Transition CONFIRMED → PREPARING	1. Owner changes status to "PREPARING".	Status updated in real-time (WebSocket or polling).	Status updated in real-time (WebSocket or polling).	Pass
TC-040	Status Transition READY → OUT_FOR_DELIVERY	1. Owner changes status to "READY". 2. Staff or owner marks "OUT_FOR_DELIVERY".	Status updated; customer notified.	Status updated; customer notified.	Pass
TC-041	Final Status DELIVERED	1. Order status changes to "DELIVERED".	Order marked complete; review option available for customer.	Order marked complete; review option available for customer.	Pass
TC-	Staff Request	1. Log in as STAFF. 2. Request status	Request created;	Request created;	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
042	Status Change	change (e.g., PREPARING → READY).	owner notified; awaits approval.	owner notified; awaits approval.	
TC-043	Owner Approves Staff Status Change	1. Owner receives staff request. 2. Click Approve.	Order status updated; staff and customer notified.	Order status updated; staff and customer notified.	Pass
TC-044	Owner Rejects Staff Status Change	1. Owner receives staff request. 2. Click Reject.	Request marked as rejected; owner can provide feedback.	Request marked as rejected; owner can provide feedback.	Pass

#### Phase 7: Payment Integration (Razorpay)

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-045	Create Razorpay Order	1. User proceeds to checkout with total amount 500 INR. 2. Backend creates Razorpay order.	Razorpay order created; orderId returned to frontend.	Razorpay order created; orderId returned to frontend.	Pass
TC-046	Razorpay Payment Modal Opens	1. Checkout page displays Razorpay modal.	Payment form shows; customer can enter card/UPI details.	Payment form shows; customer can enter card/UPI details.	Pass
TC-047	Successful Payment (Test Card)	1. Enter Razorpay test card: 4111 1111 1111 1111. 2. Enter any future	Payment successful; signature verified; order	Payment successful; signature verified; order	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
		expiry, any CVV. 3. Click Pay.	status → "PAID".	status → "PAID".	
TC-048	Failed Payment	1. Enter declined test card: 4000 0000 0000 0002. 2. Click Pay.	Payment declined; error message shown; order status → "FAILED".	Payment declined; error message shown; order status → "FAILED".	Pass
TC-049	Payment Signature Verification	1. Backend verifies Razorpay signature.	Signature valid; payment recorded securely.	Signature valid; payment recorded securely.	Pass
TC-050	Payment Record Creation	1. Successful payment.	Payment record created in database with details (amount, orderId, status, timestamp).	Payment record created in database with details (amount, orderId, status, timestamp).	Pass

#### Phase 8: Reviews & Ratings

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-051	Submit Food Review	1. Log in as USER (customer). 2. Go to ordered food. 3. Click "Write Review". 4. Enter rating (1-5) and comment. 5. Submit.	Review created; stored in database; displayed on food details page.	Review created; stored in database; displayed on food details page.	Pass
TC-052	View Food Reviews	1. Click on a food item. 2. Scroll to reviews section.	All reviews displayed with user name, rating, comment, timestamp.	All reviews displayed with user name, rating, comment, timestamp.	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-053	Update Own Review	1. User edits their own review (rating/comment).	Review updated; timestamp reflects edit time.	Review updated; timestamp reflects edit time.	Pass
TC-054	Delete Own Review	1. User deletes their review.	Review removed from database and UI.	Review removed from database and UI.	Pass
TC-055	Prevent Duplicate Review	1. User attempts to submit second review for same food.	Error: "You have already reviewed this food".	Error: "You have already reviewed this food".	Pass
TC-056	Rating Aggregation	1. View food with multiple reviews (ratings: 5, 4, 3).	Average rating calculated: $(5+4+3)/3 = 4.0$ displayed.	Average rating calculated: $(5+4+3)/3 = 4.0$ displayed.	Pass

#### Phase 9: Staff Management

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-057	Owner Sends Staff Invite	1. Log in as RESTAURANT owner. 2. Go to Staff section. 3. Enter staff email. 4. Assign role (MANAGER/CHEF/DELIVERY/STAFF). 5. Send invite.	Invite created; token generated; email sent to staff with registration link.	Invite created; token generated; email sent to staff with registration link.	Pass
TC-058	Staff Registers with	1. Staff clicks email link. 2. Enters password and details. 3. Confirms	Staff user created; userType	Staff user created; userType	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
	Invite Token	registration.	set to STAFF; linked to restaurant.	set to STAFF; linked to restaurant.	
TC-059	Invite Token Expiry	1. Invite created and expires after 7 days. 2. Staff tries to use expired token.	Error: "Invite has expired. Request a new invite".	Error: "Invite has expired. Request a new invite".	Pass
TC-060	Owner Approves Staff	1. Owner receives staff registration. 2. Clicks Approve in Staff Management.	Staff status → "active"; staff can access dashboard.	Staff status → "active"; staff can access dashboard.	Pass
TC-061	Owner Rejects Staff	1. Owner clicks Reject on pending staff.	Staff status → "inactive"; cannot log in.	Staff status → "inactive"; cannot log in.	Pass
TC-062	Staff Requests Status Change	1. Log in as STAFF. 2. View order. 3. Request status change from "PREPARING" to "READY".	Request sent to owner; awaits approval.	Request sent to owner; awaits approval.	Pass

#### Phase 10: Subscription Plans

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-063	View Subscription Plans	1. Log in as RESTAURANT. 2. Go to	All plans displayed (FREE, BASIC, PREMIUM) with	All plans displayed (FREE, BASIC, PREMIUM) with	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
		Subscriptions.	features and pricing.	features and pricing.	
TC-064	Subscribe to Plan	1. Select PREMIUM plan. 2. Proceed to checkout. 3. Complete payment.	Subscription created; plan activated; features unlocked.	Subscription created; plan activated; features unlocked.	Pass
TC-065	Subscription Limit on Menu Items	1. RESTAURANT on FREE plan (10 food limit). 2. Have 10 items. 3. Try to add 11th.	Error: "Inventory limit reached. Upgrade subscription".	Error: "Inventory limit reached. Upgrade subscription".	Pass
TC-066	Subscription Limit on Staff	1. RESTAURANT on BASIC plan (3 staff limit). 2. Have 3 staff. 3. Invite 4th staff.	Error: "Staff limit reached for your plan".	Error: "Staff limit reached for your plan".	Pass
TC-067	Cancel Subscription	1. Log in as RESTAURANT. 2. Go to Subscriptions. 3. Click Cancel Plan.	Subscription cancelled; reverts to FREE plan on next billing cycle.	Subscription cancelled; reverts to FREE plan on next billing cycle.	Pass
TC-068	Upgrade Subscription	1. Current plan: BASIC. 2. Click Upgrade to PREMIUM. 3. Pay difference.	Plan upgraded; new features available immediately.	Plan upgraded; new features available immediately.	Pass

## Phase 11: Admin Dashboard

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-069	Admin Views All Users	1. Log in as ADMIN. 2. Go to User Management.	All users listed with role, email, status, approval flag.	All users listed with role, email, status, approval flag.	Pass
TC-070	Admin Suspends User	1. Select a user. 2. Click Suspend.	User status → "inactive"; user cannot log in.	User status → "inactive"; user cannot log in.	Pass
TC-071	Admin Approves Restaurant	1. Go to Restaurant Approvals. 2. Review pending restaurants. 3. Click Approve.	Restaurant status → "approved"; owner notified.	Restaurant status → "approved"; owner notified.	Pass
TC-072	Admin Views Orders	1. Go to Order Management. 2. View all orders.	Orders listed by date, restaurant, customer, status; searchable.	Orders listed by date, restaurant, customer, status; searchable.	Pass
TC-073	Admin Views Revenue Analytics	1. Go to Analytics. 2. View revenue by restaurant.	Bar chart showing revenue distribution; total revenue displayed.	Bar chart showing revenue distribution; total revenue displayed.	Pass
TC-074	Admin Views Order Distribution	1. Go to Analytics. 2. View order status distribution.	Pie chart showing orders by status (PLACED, PENDING, DELIVERED, etc.).	Pie chart showing orders by status (PLACED, PENDING, DELIVERED, etc.).	Pass
TC-	Admin Views Subscription	1. Go to Analytics. 2. View	Line chart showing	Line chart showing	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
075	Revenue	subscription income.	subscription revenue over time.	subscription revenue over time.	
TC-076	Admin Manages Foods	1. Go to Food Management. 2. View/filter foods by restaurant.	Foods listed; can edit or delete if needed.	Foods listed; can edit or delete if needed.	Pass

#### Phase 12: Email & SMS Notifications

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-077	Email Verification Sent	1. User registers.	Email received with verification code/link.	Email received with verification code/link.	Pass
TC-078	SMS OTP Verification	1. User completes phone verification.	SMS received with 6-digit OTP.	SMS received with 6-digit OTP.	Pass
TC-079	Order Confirmation Email	1. User places order.	Confirmation email sent with order details, amount, estimated delivery.	Confirmation email sent with order details, amount, estimated delivery.	Pass
TC-080	Order Status Update Notification	1. Restaurant updates order status.	Customer receives email/SMS with new status.	Customer receives email/SMS with new status.	Pass
TC-081	Staff Invite Email	1. Owner sends staff invite.	Staff receives email with registration link and token.	Staff receives email with registration link and token.	Pass
TC-	Payment	1. Payment	Customer receives invoice/receipt	Customer receives invoice/receipt	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
082	Receipt Email	successful.	email.	email.	

### Phase 13: Security & Performance

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-083	CORS Configuration	1. Frontend makes request from <a href="http://localhost:5173">http://localhost:5173</a> .	Request accepted; backend allows CORS from configured frontend URL.	Request accepted; backend allows CORS from configured frontend URL.	Pass
TC-084	SQL Injection Prevention	1. Enter malicious SQL in search/input field: ' OR '1'='1.	Input sanitized; no database compromise; error message if invalid.	Input sanitized; no database compromise; error message if invalid.	Pass
TC-085	XSS Protection	1. Enter JavaScript payload in review comment: <script>alert('XSS')</script>.	Script tags escaped/sanitized; rendered as text.	Script tags escaped/sanitized; rendered as text.	Pass
TC-086	API Response Time (Homepage)	1. Load frontend homepage.	Page loads in < 2 seconds.	Page loads in < 2 seconds.	Pass
TC-087	API Response Time (Order Creation)	1. Place order.	Order created and confirmed in < 3 seconds.	Order created and confirmed in < 3 seconds.	Pass
TC-	Concurrent Users	1. Simulate 100+ concurrent users	System remains responsive; no	System remains responsive; no	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
088	(Load Test)	browsing.	crashes; load time < 5 seconds.	crashes; load time < 5 seconds.	
TC-089	Database Query Performance	1. Admin views analytics with 10,000+ orders.	Data loads in < 5 seconds; no timeouts.	Data loads in < 5 seconds; no timeouts.	Pass
TC-090	Password Hashing	1. Check stored password in database.	Password is hashed (bcrypt); not plain text.	Password is hashed (bcrypt); not plain text.	Pass

## Bug Tracking

Bug ID	Bug Description	Severity	Status	Assigned To	Steps to Reproduce	Expected Behavior	Actual Behavior	Notes
BG-001	[e.g., "User login fails with special characters in password"]	[Low/Medium/High]	[Open/In Progress/Closed]	[Dev Name]	1. Register with password containing @#\$%. 2. Try to log in.	User logs in successfully.	Login fails with error.	Priority: High – security risk.
BG-	[e.g., "Cart total not	[Medium]	[Open]	[Dev Name]	1. Add item	Total recalculated	Total remains	Needs frontend

Bug ID	Bug Description	Severity	Status	Assigned To	Steps to Reproduce	Expected Behavior	Actual Behavior	Notes
002	updating when quantity changed"]			e]	to cart. 2. Change quantity. 3. Check total.	immediately.	same as before.	review.
BG-003	[e.g., "Email verification code expires too quickly"]	[High]	[In Progress]	[Dev Name]	1. Register. 2. Wait 2 minutes. 3. Try to verify.	Code still valid for ~24 hrs.	Code expires after 5 minutes.	Token expiry logic bug in backend.
BG-004	[e.g., "Razorpay signature verification fails intermittently"]	[High]	[Open]	[Dev Name]	1. Complete 10 payments.	All payments verified successfully.	2 out of 10 fail verification.	Investigate signature logic.
BG-005	[e.g., "Staff cannot see order details assigned to them"]	[Medium]	[Closed]	[Dev Name]	1. Log in as STAFF. 2. View orders.	All assigned orders visible.	No orders displayed.	Fixed: Added order filtering by staff.

Bug ID	Bug Description	Severity	Status	Assigned To	Steps to Reproduce	Expected Behavior	Actual Behavior	Notes
BG-006	[e.g., "Order status update not real-time"]	[Medium]	[In Progress]	[Dev Name]	1. Owner updates order status . 2. Customer refreshes page.	Status updates immediately (WebSocket).	Requires manual page refresh.	Pending WebSocket implementation.
BG-007	[e.g., "Image upload fails for >5MB files"]	[Low]	[Closed]	[Dev Name]	1. Upload 6MB image .	Validation error; prompted to compress.	File uploads but may cause memory issues .	Fixed: Added proper validation.
BG-008	[e.g., "Admin analytics show incorrect revenue totals"]	[High]	[Open]	[Dev Name]	1. Log in as ADMIN. 2. View revenue.	Total = sum of all payments.	Total off by ±10%.	Check aggregation query.
